## SUMMARY

I am an aspiring developer with a keen interest in both frontend and backend technologies. My goal is to create innovative user experiences while building robust and scalable applications. With a solid foundation in Computer Science, I am focused on applying my practical skills in real-world scenarios, especially through impactful projects that solve real problems.

## EDUCATION

### Bachelor of Technology in Computer Science and Engineering

**Jyothishmathi Institute of Technology and Science**

📅 08/2021 - 08/2024   📍 Karimnagar

### Diploma in Computer Science and Engineering

**Govt. Polytechnic College**

📅 08/2018 - 08/2021   📍 Nizambad

### School Graduation

**Siddhartha High School**

📅 07/2012 - 07/2018   📍 Karimnagar

## LANGUAGES

### English

## PROJECTS

### Online Farmer Crop Auction

An online application designed to assist farmers in selling their produce to the highest bidder.

- Developed an online auction-based system for farmers to sell produce to wholesalers.
- Facilitated bidding process where merchants place bids on listed goods.

### Virtual Air Board

A technology to identify and classify human hand movements.

- Created a system for real-time hand gesture recognition using Python.
- Developed applications for controlling devices and gaming functions.

### Predico

A disease prediction system providing online consultations.

- Designed a web application for disease prediction based on user input.
- Utilized data mining techniques for accurate illness identification.
